(54) DOCUMENT AND IMAGE FILING DEVICE

(57)Abstract:

PURPOSE: To provide the electronic functions of a Hotchkiss and a clip by providing a selective image information table to store information in a storage means at every plural groups, and a group classification table to store the name of each group.

CONSTITUTION: The storage means 10 is provided with the selective image information table to store the information corresponding to a storing position at the accumulation means 3 of a retrieval image designated by a first indication means 4 at every plural groups, and the group classification table to store a group name inputted from the indication input means 4. After the group name is inputted from the indication input means 4, a corresponding group is retrieved from the group classification table corresponding to display indication from a second indication means 4, and only a selected retrieval image which belongs to the group is taken out from the accumulation means 3 according to the information of the selective image information table, and is displayed selectively on a display means 7. Therefore, it is possible to file documents as a bundle, or to separate a bundle of document to every sheet.
